

CreatorStack — All-In-One Creator Tool Reselling

Replace three creator subscriptions with one — and earn on every signup.

What It Is

CreatorStack is a business built around reselling and onboarding creators onto an all-in-one creator platform (like Superprofile) that bundles auto-DMs, link-in-bio store, digital products, courses, and memberships into a single dashboard. Today most creators juggle ManyChat + Linktree + Stan Store — three apps, three bills. Your business is helping creators consolidate onto one tool and getting paid to do it.

How It Makes Money

Three models, stackable. (1) **Affiliate/referral** — earn recurring commissions for every creator you sign up to the platform. (2) **Done-for-you setup** — charge creators a one-time fee to configure their auto-DM keyword flows, bio store, and product funnels. (3) **Agency retainer** — manage the whole creator-monetization stack monthly. Buyers are coaches, influencers, and small e-commerce creators who want to monetize but hate technical setup.

Startup Costs

- Platform subscription(s) to learn and demo (Superprofile/similar — often **\$5–\$30/month**, sometimes a cheap first month).
- Your own creator profile/store as a live demo: **\$0–\$50**.
- Landing page + booking calendar (Coolify-hosted Next.js or a simple builder): **\$0–\$200**.
- Screen-recording + content tools (Loom, CapCut): **\$0–\$30/month**.
- Outreach tools / spreadsheet CRM: **\$0–\$50/month**.
- Optional paid ads to test offers: **\$300–\$1,000**.
- **Lean start: under \$500 — this is a near-zero-overhead service business.**

The Numbers

DFY setup: charge **\$150–\$500** per creator to build their auto-DM flows, link-in-bio store, and a product funnel; each takes 1–3 hours → **~\$100–\$450 profit per client**. Land 15 setups/month = **\$3,000–\$7,500**. **Affiliate:** even modest recurring commissions across 50–100 referred creators compound into **\$500–\$2,000/month** passive. **Retainers:** 5 creators at **\$300–\$800/month** to manage their stack = **\$1,500–\$4,000/month** recurring. A realistic blended month: **\$5,000–\$12,000** with almost no hard costs.

How To Start

1. Sign up for the platform, build your own profile/store, and master auto-DM keyword flows end to end.
2. Document the full setup as a repeatable checklist so you can do it for clients in under an hour.
3. Record a 60-second demo showing "comment a keyword → instant DM" working live.
4. Productize three offers: a one-time DFY setup, an affiliate signup, and a monthly management retainer.
5. Build a simple landing page with a booking link and before/after of a creator's funnel.
6. DM 20 small creators a day offering a free auto-DM setup as a foot-in-the-door, then upsell.
7. Stack affiliate links into every build so each client also becomes recurring commission.

Where To Get Customers

Instagram and TikTok DMs to coaches, fitness/finance/niche influencers, and digital-product sellers; creator and "make money online" Facebook groups and Discords; your own content demonstrating the auto-DM trick (meta — it markets itself); and partnerships with social media managers who lack the tech setup skills.

Pro Tips

- Use the auto-DM tool on your *own* content to capture leads — every "comment KEYWORD" post becomes a live demo and a lead magnet at the same time.
- Lead with a free setup to remove friction; once a creator's funnel is live and earning, the retainer and affiliate income are easy upsells.
- Productize ruthlessly — a fixed checklist turns this into an hourly-rate machine you can later hand to a VA and scale.
